Profile

I build and maintain business software in PHP. Recent work is a Laravel ERP for catalog, inventory, orders, and shipments. Earlier roles covered academic systems, a freelance sales API, and a Vue.js storefront.

At PT Bonofactum I work on Manobo, the company's Laravel and Livewire ERP. I add product, stock, order, inventory, and shipment features, including warehouse screens and item classification. The same codebase publishes product and inventory events through a message-broker outbox, recalculates catalog cost, and runs scheduled KPI and reporting jobs. I refactor the older PHP and cover the behavior with PHPUnit.

Experience

PT Bonofactum

Aug 2022 – Present

PHP Developer · Bali, Indonesia

- I add Laravel and Livewire features for products, stock, orders, inventory, and shipments, including warehouse screens, item classification, and purchase-order pick lists.
- I record product and inventory changes in a message-broker outbox and publish them with scheduled Pub/Sub jobs.
- I maintain COGS settings and history, article-level COGS on product analysis exports, and the catalog cost stored on each product after recalculation.
- I support EDI order and despatch-advice messages, and ChannelAdvisor product, stock, and order exchange.
- I build scheduled reports and KPI jobs, including daily production closing, and cover them with PHPUnit.
- I refactor legacy PHP for readability, maintainability, and performance, streamline MySQL access, and mentor junior developers.

PHP, MySQL, JavaScript, jQuery, Bootstrap, Laravel, Livewire, Docker with WSL 2, Linux server

IT Del

May 2020 – July 2022

Software Engineer · Laguboti, Indonesia

- I added features the academic community uses: an academic calendar, bursar payments, automated task checking, task reminders, and reports in charts and documents.
- I integrated the system with Feeder DIKTI and SPADA, and with the BNI and Mandiri banking systems.
- I designed databases, managed cPanel hosting, and maintained other departments' sites on Laravel, Yii2, Yii1, WordPress, and related stacks.

Yii2, MySQL, REST API, Linux server, Moodle, CWP web panel, PHP, GitLab

Insight

Jan 2020 – Mar 2021

Back-end Developer · Freelance · Medan, Indonesia

- I built the backend and REST API for a noodle-sales system.
- I designed the database and the business processes around it.
- I integrated the DANA payment system and customer payment tracking.
- I trained internship students.

Laravel, MySQL, REST API, DANA payment API, GitLab

Royale Utama Makmur

Aug 2018 – Dec 2019

Front-end Developer · Medan, Indonesia

- I built the Vue.js front end for an ecommerce site so the interface stays usable from phones through desktops, on macOS and Windows browsers.
- I tested the web application with LambdaTest.

Vue.js, Laravel, Raja Ongkir API, PostgreSQL, REST API, LambdaTest, GitHub

Projects

Sistem Informasi HIV/AIDS Ministry HKBP

Sep 2021 – Jul 2022

Clinical HIV data-management system. It covers patient registration, counseling, follow-up, clinical examinations, ART therapy including ARV regimen changes, work programs for benefits and nutrition, reference master data, and PDF and Excel reports and exports.

PHP 8.4, Laravel 11, Filament v5, Livewire 4, MySQL 8.5, Redis · Systems Analysis, System Development

Sistem Informasi Difabel Hephata

Jul 2020 – Jan 2021

Information system for Yayasan Panti Hephata that digitalizes data management: placement in the institution and in RBM (community-based rehabilitation homes), health history, education and achievements, and staff and caregiver data. I analyzed requirements, designed the system, developed features, managed the database, and tested the system. The project made the data more structured, centralized, and easier to access for administration and services.

System Development, Database Management System (DBMS)

Skills

Languages. Indonesian (fluent), English (intermediate).

Programming. PHP, JavaScript

Frameworks. Laravel, Yii2, Livewire, Bootstrap, Vue.js

Databases. MySQL, PostgreSQL

Backend & API. RESTful API, authentication, payment gateway integration (DANA, BNI)

Tools. Git, GitLab, Docker, WSL 2, cPanel, Linux server, Moodle, CWP web panel

Concepts. MVC, microservices, unit testing

Education

Bachelor of Computer Science

Diponegoro University · Semarang, Indonesia
In progress · May 2028

Organizations

Public Relations, PMK

2014–2015 · Diponegoro University

Vice President

2011–2012 · Middle School Student Council
